

### Salient features:

- Uniform illumination without fumes and ultra violet.
- Aesthetically designed portable light with LED's indications showing battery charging & battery low.
- Long lasting efficient LED's providing constant brightness and having a life of 50,000 hrs.
- It is a Green Energy saving environmentally lighting products.
- Reflector assembly that reflects the light source emissions into concentrated light paths.
- No regular maintenance and zero running cost on solar.
- Protected from overcharging and deep discharging of battery.

### Technical Specifications

Module :	Rating :	12V, 2.5Wp - 5Wp
	Type :	Crystalline Silicon cell
Battery :	Rating :	12V, 7Ah
	Type :	Lead Acid SMF battery with C/20 Discharging
Lamp :	Rating :	(0.06 to 0.66 Wats) per LED
	Type :	60 Nos of High Bright LED's
Indications :	Red :	Battery Low
	Green :	Battery charging
Electronics Protections From :		Over charging and discharging Reverse flow No load Short Circuit Open Circuit Temperature Compensation
Usage Duration :		Up to 4 hours per day with 3 days autonomy
Weight :		3 Kg
Dimensions of Lantern with packing box :		193 x 193 x 335 (L.W.H)
